

# Remote Patient Monitoring Enables Tracking At-Risk Patients at Home While Boosting Provider Incomes

KangarooHealth provides a turn-key remote monitoring solution called Haku, enabling tracking patients at home via connected devices and automatically identifying high-risk patients for providers.

- Zero upfront costs
- One page sign up form
- Maintenance free
- Monthly recurring reimbursement
- Boost patient retention & satisfaction

Remote patient monitoring is clinically validated by CMS over 400,000 patients.

Convert care time between visits into new reimbursements

Add additional visits as needed between scheduled follow-ups

Improve patient compliance and retention via app-based reminders

Reduce readmission and adverse events, and improve quality scores

Enable focusing on high-risk patients

hello@kangaroohealth.com

KangarooHealth has helped over 10,000 patients, collaborating with hospitals and physician groups.

KangarooHealth enables providers to qualify for monthly recurring reimbursements as supplemental income: \$600,000+ annual revenue for every 500 patients.

500 patients
